

## Accessing E-Resources from Off Campus

### I'm at home, how do I log in to Galvin E-Resources?

The easiest way to ensure that you are logged in for all of Galvin Library's electronic resources (such as article databases and online journals) is to log in via MyIIT (<http://my.iit.edu>). Your login information is the same as your username and password for your IIT email address.

Once you have logged in, you will see the following images on the upper right side. Click on library e-resources.

You are now logged into all Galvin Library E-Resources, and will be directed to the Find E-Resources page. Select the resource you wish to use either by title, subject, or type. You are logged in until you close your web browser.
